## SYSTEM PAR 24V PSU

The Parrot International PAR 24 V Power supply is a PSU specifically designed to power up to two PAR 4- 20mA receivers or up to five other modules.

Universal voltage input 100 to 240 Volts AC.

Output 24Vdc @ 230 mA

The PAR 24 PSU is designed to fit on a standard DIN rail

Incorporating the latest low power long range wireless LoRa technology, Parrot Wireless's devices use sophisticated and highly robust Chirped Spread Spectrum (CSS) modulation techniques to provide best-in-class sensitivity, blocking performance and improved interference immunity.

Coupled with advanced Digital Signal Processing (DSP), Parrot Wireless achieves greater wireless range for minimal power consumption, making it suitable for mains and battery powered applications alike.

### FEATURES

- Clips onto standard DIN rail
- Universal voltage input
- Easy view LEDs for operational status
- Resettable thermal fuse.
- Isolation class II
- Modules are "colour coded" for easy identification
